

AMENDMENTS TO THE CLAIMS:

Please amend the claims as follows:

1. (Currently Amended) A method of automatically replying to a received e-mail in a mobile terminal having a function of transmitting and receiving an e-mail, the method comprising: ~~the step of~~

determining whether to automatically reply to the received e-mail;

determining whether the received e-mail originates from a known address;

determining whether text data is associated with the known address;

determining whether image data is associated with the known address;

editing the image data in accordance with the known address;

automatically transmitting the image data determined in accordance with ~~an~~ the known address of a ~~transmitter of~~ said received e-mail, to said address if the method determines to automatically reply to the received e-mail.

2. (Cancelled)

3. (Currently Amended) The method as set forth in claim 1, wherein said image data is ~~comprised of~~ comprises moving-image data.

4. (Currently Amended) The method as set forth in claim 1, wherein text data determined in accordance with said known address is automatically transmitted together with said image data.

5. (Currently Amended) The method as set forth in claim 1, further comprising ~~the step of~~ determining whether said image data is automatically transmitted in response to said received e-mail.

6. (Currently Amended) A method of automatically replying to a received e-mail in a mobile terminal having a function of transmitting and receiving an e-mail, comprising ~~the steps of~~:

(a) checking whether an address of a transmitter of a received e-mail is stored in a memory;

(b) checking whether image data associated with said address is stored in said memory;

editing said image data in accordance with said address; and

(c) transmitting said image data to said address.

7. (Currently Amended) The method as set forth in claim 6, further comprising ~~the step of (d)~~ judging whether it is determined to automatically transmit image data determined in accordance with said address, to said transmitter, said ~~step (d)~~ judging being carried out prior to said checking ~~step (a)~~.

8. (Currently Amended) The method as set forth in claim 6, further comprising ~~the steps of~~ (e) checking whether text data associated with said address is stored in said memory, wherein said text data is transmitted to said address together with said image data in said transmitting ~~step (e)~~.

9. (Cancelled)

10. (Currently Amended) The method as set forth in claim 6, wherein said image data is ~~comprised of~~ comprises moving-image data.

11. (Original) A mobile terminal having functions of transmitting and receiving an e-mail, and automatically replying to a received e-mail, comprising a controller for automatically transmitting image data determined in accordance with an address of a transmitter of said received e-mail.

12. (Original) The mobile terminal as set forth in claim 11, wherein said controller edits said image data in accordance with said address.

13. (Currently Amended) The mobile terminal as set forth in claim 11, wherein said image data is ~~comprised of~~ comprises moving-image data.

14. (Original) The mobile terminal as set forth in claim 11, wherein text data determined in accordance with said address is automatically transmitted together with said image data.

15. (Currently Amended) The mobile terminal as set forth in claim 11, wherein said mobile terminal is ~~comprised of~~ comprises a cellular phone.

16. (Currently Amended) The mobile terminal as set forth in claim 11, wherein said

controller ~~includes~~ comprises:

a data processor; ~~and a memory;~~

~~said memory including~~ a first memory area for storing addresses to which an e-mail is automatically transmitted; ~~and;~~

a second memory area for storing moving-data to be edited by a user of said mobile terminal for each of said addresses;

~~said data processor including~~ a first retriever which retrieves said addresses stored in said first memory area; ~~and;~~

a second retriever which retrieves said moving-data stored in said second memory area

a third memory area for storing a message to be edited by said user; and

a third retriever which retrieves said message stored in said third memory area.

17. (Cancelled)

18. (Currently Amended) The mobile terminal as set forth in claim 11, wherein said controller comprises ~~includes~~ a unit for determining whether said image data is automatically transmitted in response to said received e-mail.

19. (Currently Amended) A computer readable medium comprising a program for causing a computer to carry out a method of automatically replying to a received e-mail in a mobile terminal ~~having comprising~~ a function of transmitting and receiving an e-mail, wherein steps executed by said computer in accordance with said program include and automatically

transmitting image data determined in accordance with an address of a transmitter of said received e-mail, to said address.

20. (Currently Amended) A computer readable medium comprising a program for causing a computer to carry out a method of automatically replying to a received e-mail in a mobile terminal having comprising a function of transmitting and receiving an e-mail, wherein the program comprising executable steps to be executed by said computer in accordance with said program, comprising include:

(a) checking whether an address of a transmitter of a received e-mail is stored in a memory;

(b) checking whether image data associated with said address is stored in said memory;

checking whether text data is associated with the known address:

editing the image data in accordance with the known address; and

(c) transmitting said image data to said address.

21. (Currently Amended) The computer readable medium of program as set forth in claim 20, wherein said steps further include (d) comprising an executable step of judging whether it is determined to automatically transmit image data determined in accordance with said address, to said transmitter, said step (d) judging being carried out prior to said step (a) checking.

22. (Currently Amended) The computer readable medium of program as set forth in claim

20, ~~wherein said steps further include (e) comprising an executable step of checking whether~~
text data associated with said address is stored in said memory, wherein said text data is
~~transmitted to said address together with said image data in said transmitting step (e).~~

23. (New) The method of claim 1, further comprising recording an image to be provided
to the received e-mail.
